Software Engineer

About Us

SmartAsset is an online destination for consumer-focused financial information and advice that powers SmartAdvisor, a national marketplace connecting consumers to financial advisors. Reaching approximately 75 million people each month (as of Sept. 2021) through its educational content and personalized calculators and tools, SmartAsset's mission is to help people make smart financial decisions. Ranked on the Inc. 5000 and Deloitte Technology Fast 500™ lists of fastest-growing companies in 2021, SmartAsset recently closed a \$110 million Series D round, valuing the company at over \$1 billion. SmartAsset was also named to Y Combinator's list of Top 100 Companies of all time and Forbes' list of America's Best Startup Employers in 2020. For more information, please visit SmartAsset.com.

About You

- Deliver, as part of an Agile Delivery Team, secure, scalable, performant cloud services and applications
- Develop reusable, efficient, and testable code, modules, and libraries
- Design and deliver APIs supporting our front end and mobile technology platforms
- Interface with other teams in Tech, Data, and Product to understand and deliver new solutions and services
- Actualize security and performance as priorities, not afterthoughts
- Manage and create useful documentation as part of the delivery process

Required Skills/Experience

- Bachelors Degree or equivalent experience
- 3+ years experience in Python, Java or a similar language in an Agile (Scrum, Kanban, Lean, XP) environment
- 3+ years of relevant framework experience (Django, Flask, Pyramid, Spring, etc)
- 2+ years of ORM experience such as SQLAlchemy
- Understanding of cloud (AWS) services such as RDS, EC2, ECS, Lambdas
- Expertise in templating such as Jinja or Mako
- Working knowledge of front end technologies (HTML, CSS, JavaScript)
- Hands-on experience with data integration, RESTful APIs, logging, and performance/profiling
- Experience with git (GitLab, GitHub, Bitbucket)

Preferred Skills/Experience

- Experience in microservice engineering/architecture
- AWS Certification (Associate Level)
- Experience with automated integration and unit testing
- Experience with CI/CD tools such as GitLab pipelines, Ansible, and/or Jenkins

Perks:

- Virtual happy hours and team social activities
- Generous benefits package with cost of some medical and dental plans covered at 100%
- 401(k) plan with match that immediately vests
- Professional education reimbursement program
- Paid Parental Leave
